A-90-16

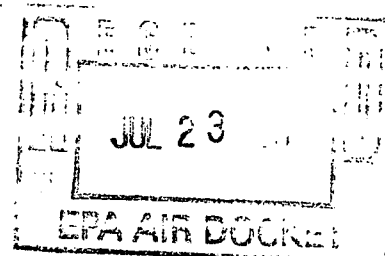

State Senator **BRIAN D. RUDE**
ASSISTANT SENATE REPUBLICAN LEADER

32ND DISTRICT

A-90-16
IV-D-50

July 20, 1990

The Honorable William K. Reilly, Administrator
Environmental Protection Agency
401 M Street Southwest
Washington D.C. 20460

Dear William:

It is with great concern for air quality that I write you today, as air pollution is a problem throughout the country. The search for ways to reduce air pollution is a constant effort and it is my understanding a new performance additive known as HiTEC 3000 could potentially improve air quality in the United States.

This additive seems to significantly reduce smog-producing Nitrogen Oxide, as well as overall tailpipe emissions. Apparently HiTEC 3000 is compatible with gasolines containing methanol, ethanol and other reformulated fuels.

To be certain, it's very important ways to improve our nation's air quality be examined to the fullest and it is hoped this additive will be given every possible consideration by the Environmental Protection Agency.

Thank you for your time and attention to this matter.

Best regards,
